SUMMARY

Trilingual University of Washington Sociology major and Business minor with experience turning fragmented market, customer, supplier, and audience information into clear business recommendations. Background spans business analysis, consumer and market research, pricing and supply-risk modeling, international marketing, and Japanese/Chinese localization. Interested in consumer insights, market research, brand strategy, loyalty/CRM, travel and hospitality, beauty/fragrance, and luxury.

SKILLS

Languages: Chinese — Native | English — Fluent | Japanese — Fluent, JLPT N1
Research & Analysis: Consumer & Market Research | Research Synthesis | Data Reconciliation | Scenario Analysis | KPI Tracking | Source Evaluation | Data Analysis
Marketing & Communication: Audience Insights | Brand Strategy | Content Localization | Cross-Cultural Communication | Executive Presentation Development | Business Writing
Business & Tools: Excel | PowerPoint | Google Workspace | R | Quarto | Figma | Canva | Python — Basic

EXPERIENCE

Angstrom Electric | Marketing, Sales & Communication Intern / Sales Account Support Intern, July 2026 – August 2026

- Reconciled 5 independent customer, supplier, and logistics sources across 20 components and 11 inbound containers, resolving conflicting dates and quantities and surfacing a 193-piece discrepancy before shortage and expedite decisions.
- Demonstrated that aggregate supply exceeding aggregate demand still left 10 components short, isolating a part-level mix problem and shifting analysis from bulk freight timing to supplier production priorities.
- Modeled parallel build and expedite scenarios across 2 competing customer release versions differing by 923 units, quantifying the operational impact of each for management review.
- Proactively revalidated a production-capacity model before management action, identified double-counting across demand waves, and reissued a corrected plan eliminating an unsupported shift-change recommendation.
- Built an Excel pricing model from historical aluminum-market data and reconciled calculated selling prices with SAP history, translating quarterly price movements into pricing insights and adjustment recommendations.
- Synthesized fragmented Angstrom Electric and partner-company product, manufacturing, and engineering materials into a consolidated customer presentation, translating technical capabilities into a cohesive brand and product narrative.

SpectraCell Laboratories, Inc. | International Business Development and Marketing Intern, June 2025 – September 2025

- Localized 11+ technical, clinical, and marketing materials spanning 140+ pages/slides into Japanese and Chinese, adapting content on 30+ micronutrients and biomarkers, genetics, cardiovascular testing, and biological aging for international audiences.
- Localized and formatted a 30-slide bilingual micronutrient-testing presentation for a webinar with 100+ participants, translating complex clinical information into clear, audience-appropriate Japanese.
- Provided live English–Japanese interpretation and transcribed and translated a multi-stakeholder Japanese meeting, documenting key decisions and follow-up actions for U.S. and Japanese teams.
- Evaluated campaign performance, creative testing, and audience engagement in weekly marketing strategy meetings, contributing insights used to refine messaging and international marketing initiatives.

White House Black Market, Inc. | Sales Associate, June 2025 – August 2025

- Processed 40+ customer transactions per shift across purchases, returns, loyalty sign-ups, and online orders with full payment accuracy.
- Coordinated backroom-to-floor product flow with near-100% inventory accuracy while assisting customers with styling, fitting, returns, and product questions during high-volume periods.
- Executed visual merchandising, floor sets, restocking, and store organization to improve product accessibility and customer navigation while supporting daily sales targets.

SELECTED PROJECTS

The Luxury Expectation Gap | Independent Consumer Insights Project, 2026 (In Progress)

- Compiled and coded 50+ luxury hotel guest-review accounts across Singapore and Kuala Lumpur, examining reported issues in service consistency, cleanliness, room condition, perceived value, and service recovery.
- Designed a reproducible research methodology to select 10 luxury hotels using independent 2025-2026 hospitality recognitions and systematically sample 200 guest reviews to evaluate gaps between brand reputation and guest experiences.
- Developed an evidence register and preliminary comparative analysis framework to identify recurring customer pain points and inform actionable hospitality brand strategy recommendations.

Digital Tool Rollout Starter Kit | Independent Portfolio Project, 2026

- Built a rollout toolkit for a pilot appointment-booking tool, covering setup, testing, training, and launch.
- Created an adoption dashboard tracking activation, training completion, bookings, and progress.
- Wrote weekly updates on rollout progress, user friction, next steps, and recommendations.

AMA Case Competition — Airline Marketing Strategy | American Marketing Association (UW Chapter), February 2025

- Developed a multi-channel launch strategy with defined KPIs and a five-year outlook aligned to growth objectives.
- Synthesized audience and competitor research into an executive briefing deck and presented to judges.
- Produced a 12-month channel mix with benchmarks, an assumptions log, and risk mitigations.

King County Market Analysis — RE 250 | University of Washington, October – November 2025

- Framed a hypothetical $100M investment in the King County/Bellevue market; assessed market conditions, key risks, and recommended strategy using public data + broker commentary + news.
- Compiled and reconciled indicators across vacancy, pipeline/supply, demand drivers, pricing/lease trends, and demographics; summarized findings into source-backed notes with citations.
- Built simple supply/demand scenarios and grouped risks by category (e.g., market, financing, execution); delivered a risk-aware recommendation that clearly stated assumptions and uncertainty.

Data Analysis & Visualization Dashboard — INFO 201 | University of Washington, October 2025

- Built an interactive R dashboard in R + Quarto linking NOAA storm events with Zillow home values using dplyr joins, date handling, and ggplot2 + plotly for exploratory visualizations.
- Wrote a fully reproducible HTML report with visible code chunks, “label-first” charts, and non-causal descriptions to communicate findings to non-technical readers.
- Completed a sequence of data assignments using tidyverse wrangling and basic interactive graphics to answer questions about Washington State vehicle registrations.

EDUCATION

University of Washington, Seattle
Intended Bachelor of Arts in Sociology | Minor in Business | Expected June 2027
